I will most certainly make the Oklahoma agencies aware of your interest in attending any public meetings they convene.

Dear Mr. Brocksmith:

I am writing in response to your questions posted to EPA’s internet web page yesterday. You asked:

- Where can I find the Illinois River watershed TMDL model just released by EPA? And,
- When are meetings scheduled on the TMDL?

EPA has corrected a technical issue which effected its website and the models are now available at the Region 6 Water Division page, <https://www.epa.gov/ok/water-oklahoma#illinois> .

EPA Region 6 will be meeting with State and Tribal members of the Illinois River Modeling Technical Workgroup next week, and a key topic of discussion will be how and when each State will engage the public and interested stakeholders in a review of the models, and the next steps each State will take.

Thank you for your continued interest in restoring and maintaining the quality of Oklahoma’s Scenic Rivers, especially the Illinois River.
